# HAM on RHY

## January 2010

The monthly newsletter of KC2RHY The Fishermen's Net youth amateur radio club

Volume 2. Issue 1

## THE BRIDGE IS MOVING

In early 2010 THE BRIDGE will move to 101 Main Street, the former Elim Church building. We will have 6 rooms in the basement. With more than five times the space we have at 19 Main Street we will have room for a dedicated ham radio area.

Unlike our current location we are free of overhead electric lines with almost no HF interference. The larger building will allow us to mount our G5RV HF wire antenna.

We are seeking one or two antenna towers to mount our antennas at our new location. Please be on the lookout for any sources of towers for our amateur radio antennas.

## SG-2020 HF Transceiver

We had an SGC-2020 HF transceiver donated to The Fishermen's Net. This nifty portable HF rig will allow us to take part in the 2010 Field Day on June 26. Coupled with a portable Slinky antenna our kids will get to see first hand how hams operate when all else fails.

## WEEKLY TECHNICIAN CLASSES TO BEGIN IN 2010

Plans are underway to have weekly classed to prepare for the Technician class amateur radio exam. With the move to 101 Main Street we may wait to begin classes til after we are settled in the new location.

## WEBSITE OF THE MONTH

## NASWA WWW Shortwave Listening Guide

http://www.naswa.net/swlguide/

Get to know your neighbors. A great way to get kids interested in HF.

## SCANNER NEWS

The ultimate scanner web site is Radio Reference. From great forums to a worldwide

frequency list with additional data such as PL's, talk groups, unit numbers and codes.
